Global-COE Frontier Seminar

ENSO prediction and seasonal forecast system at Japan Meteorological Agency/Meteorological Research Institute (JMA/MRI)

Speaker : Dr. Tamaki Yasuda  
Affiliation : Meteorological Research Institute (MRI)  
Date & Time : 15:00 - 16:30 Mar 05, 2010 on Friday  
Place : RIGAKU SOHGOH TOH Bldg. 2F #203 Lecture Room  
Contact : Assistant Prof. Shusaku Sugimoto  
TEL: EXT# 6529 / E-mail: sugimoto@pol.gp.tohoku.ac.jp

Abstract :

Japan Meteorological Agency (JMA) has been running the ENSO (El Nino- Southern Oscillation) prediction system using coupled general circulation model (CGCM) since 1999. Recently, a new version of the ENSO prediction system has been developed at JMA/Meteorological Research Institute (MRI). This system is now operationally used for ENSO prediction at JMA. Furthermore, seasonal forecast using CGCM instead of AGCM started in February 2010. In this seminar, ENSO prediction and seasonal forecast system developed at JMA/MRI is introduced.
